LEVEL 4 MSSP CORP

MANAGED IT + CYBERSECURITY + RESILIENCE

MSSP AI

Move from AI interest to secure, measurable operational value.

MSSP AI helps organizations prioritize use cases, protect sensitive data, select an architecture, govern automation, and operate artificial intelligence responsibly.

Designed for

Organizations that want to use AI or artificial intelligence without creating unmanaged data, security, compliance, integration, or support risk.

THE OPERATING PROBLEM

AI pilots often stall because the business outcome, data, permissions, architecture, governance, integration, monitoring, and accountable owner were never defined together.

1. **Use cases tied to measurable outcomes**
2. **Secure architecture and governance from the start**
3. **A supportable path from pilot to operations**

MSSP AI

Secure AI consulting and implementation

Connected capabilities

Built around ownership, evidence, and operational results - not a disconnected tool list.

- AI opportunity and workflow discovery
- Data classification and security architecture
- Public, private, and hybrid AI planning
- Agentic AI permissions and approval controls
- Integration, automation, and pilot delivery
- Monitoring, lifecycle support, and governance

A practical path forward

1 Discover

Clarify the business need, owners, constraints, risk, timing, and desired outcome.

2 Assess

Identify operational, security, evidence, integration, and recovery gaps.

3 Build

Define the right service model, roadmap, responsibilities, and next step.
