LEVEL 4 MSSP CORP

MANAGED IT + CYBERSECURITY + RESILIENCE

MSSP CONVERGE

Give internal IT deeper security operations and senior engineering capacity.

MSSP Converge strengthens an internal IT team with 24/7 monitoring, cybersecurity operations, senior escalation, and compliance support.

Designed for

Organizations with internal IT staff that want to retain operational ownership while adding security depth and specialized capacity.

THE OPERATING PROBLEM

Internal teams are often expected to run daily IT, deliver projects, manage vendors, satisfy compliance, and respond to threats without enough time or specialized depth.

1. **Internal IT retains context and control**
2. **24/7 security monitoring and escalation**
3. **Specialized capacity without duplicating the team**

MSSP Converge

Co-managed cybersecurity

Connected capabilities

Built around ownership, evidence, and operational results - not a disconnected tool list.

- SOC and SIEM operations
- MDR, XDR, and EDR oversight
- Senior engineering escalation
- Vulnerability and remediation support
- Compliance evidence and control alignment
- Incident and recovery coordination

A practical path forward

1 Discover

Clarify the business need, owners, constraints, risk, timing, and desired outcome.

2 Assess

Identify operational, security, evidence, integration, and recovery gaps.

3 Build

Define the right service model, roadmap, responsibilities, and next step.
