
LEVEL 4 MSSP CORP

MANAGED IT + CYBERSECURITY + RESILIENCE

MSSP ONE

One accountable partner for IT, security, compliance, cloud, and recovery.

MSSP One replaces fragmented providers and unclear handoffs with a unified operating model led by experienced Level 4 engineers.

Designed for

Organizations that want Level 4 to take primary responsibility for day-to-day IT and cybersecurity operations.

THE OPERATING PROBLEM

Separate helpdesks, security tools, consultants, cloud vendors, and backup providers create recurring handoff gaps, unclear ownership, inconsistent evidence, and unresolved risk.

1. **One responsibility and escalation model**
2. **Security embedded into daily IT operations**
3. **Clearer reporting, priorities, and recovery ownership**

MSSP One

Fully managed IT and cybersecurity

Connected capabilities

Built around ownership, evidence, and operational results - not a disconnected tool list.

- **Managed helpdesk and user support**
- **Monitoring, patching, and endpoint management**
- **24/7 managed security operations**
- **Identity, email, network, and cloud security**
- **Compliance alignment and evidence support**
- **Immutable backup and disaster recovery**

A practical path forward

1 Discover

Clarify the business need, owners, constraints, risk, timing, and desired outcome.

2 Assess

Identify operational, security, evidence, integration, and recovery gaps.

3 Build

Define the right service model, roadmap, responsibilities, and next step.
